SUMMARY

Associate Digital Product Manager with 7+ years of experience across digital products, customer operations, and financial services. Experienced in translating business requirements into product solutions, collaborating with cross-functional teams, driving product validation, and delivering high-quality digital experiences. Passionate about Generative AI and Agentic AI, with hands-on product design experience across PRDs, MVPs, user journeys and AI workflows.

PROFESSIONAL EXPERIENCE

American Express, Digital Product Management

12/2023 – Present | Gurgaon, India

Senior Analyst (Dec 2023 – Mar 2026) → Associate Digital Product Manager (Mar 2026 – Present)

Contributed to the product lifecycle of **CLIC**, a global internal case management platform supporting customer servicing operations, across automated refund, control management and dispute workflows.

Key Product Areas

Credit Balance Refund (CBR)

- Contributed to the **end-to-end automation of the CBR journey**, enabling eligible card-member credit balances to be refunded to bank accounts while routing complex exceptions for manual handling.
- Refined BRDs and business requirements, owned **end-to-end UAT**, and supported CBR launches across **France, Germany and Austria**, validating business rules, workflows, edge cases and release readiness.
- Managed JIRA defects and collaborated with **Product, Engineering, Development and Business teams** on root-cause analysis, resolution, regression testing and sign-offs.

App Control Management

- Contributed to **control management and product observability across CLIC**, using telemetry and application logging to improve production issue diagnosis and operational efficiency.
- Validated automated alerts and ELF logs for accuracy, completeness and timeliness; translated business requirements into test scenarios and coordinated defect resolution.

Dispute Payment Management (DPM)

- Supported **digital dispute and case-management workflows** covering dispute creation, merchant response, fraud checks, automated case creation and exception handling across self-service, digital and customer-service channels.
- Gathered and refined business requirements and performed functional, end-to-end and regression UAT; tracked defects through JIRA and coordinated fixes through final sign-off.

Product Delivery & Stakeholder Management

- Participated in **backlog refinement, sprint planning and release planning**, collaborating with Product, Business and Engineering stakeholders to translate requirements into product solutions.
- Identified workflow and process improvements and evaluated feature usability to improve product experience and release quality.

Concentrix, Senior Representative

05/2021 – 02/2023 | Noida, India

- Managed high-volume customer operations while consistently achieving quality and service-level goals.
- Resolved complex customer issues and analysed customer feedback to identify process improvements and enhance customer experience.
- Mentored a team of 15 members while maintaining accurate CRM records and operational excellence.

Riot Labz Private Limited, Customer Success Manager

05/2019 – 03/2021 | Noida, India

- Managed key customer accounts, achieving **98% client retention** through proactive relationship management.
- Led **customer onboarding and product adoption**, ensuring successful implementation and long-term engagement.
- Analysed customer feedback and usage data to recommend product and service improvements and collaborated cross-functionally to support business growth.

PROJECT

Saarthi AI, Voice-first financial inclusion AI product ([Figma Prototype Link](#))02/2026 – 06/2026 |

– Led end-to-end product design, including **PRD, MVP planning, user journeys and interactive Figma prototype.**

– Designed a voice-first AI solution to improve financial inclusion through multilingual assistance and human escalation.

– Defined a **RAG-based multi-agent architecture** and AI workflows for intelligent query resolution.

– Established product KPIs including **user adoption, CSAT, first-call resolution and intent accuracy.**

EDUCATION

BITS School of Management, *Product Management with Generative & Agentic AI*

09/2025 – 07/2026 | Mumbai, India

Delhi University, *BA Economics*

10/2018 – 10/2022 | Delhi, India
